## Providing Services

**Civil Engineering:** We offer developed technologies for various types of civil works, especially for pneumatic caisson, shield tunneling, port construction etc. As general contractor we are providing good performance to any kinds of civil works construction.

**Building Works:** We offer various types of building works, such as offices, schools, condominiums, factories.

**Overseas:** We have over 50 year experience of construction outside of Japan. We had experience in Taiwan, south-east Asia, south Asia, The Pacific state and Africa. Currently we are doing business in Taiwan, Thailand, Cambodia, Myanmar, Cote d'Ivoire and Madagascar. Especially at Madagascar we have performed many construction projects for over 40 years.

## Major Project Achievement / Technical Expertise

### ➤ Taiwan High Speed Rail, civil works contract C220

Civil works for high speed railways at Taiwan over 450km between Taipei and Kaohsiung. We designed and built for a section about 18km long, including 9,295m of viaducts and bridges, 3,750m of tunnels and 4,525m of earthwork. In addition to the civil works, we constructed a new station at Hsinchuu, most beautiful station in Taiwan high speed railways.

### ➤ Port of Ehoala (Fort Dauphin, Madagascar)

This new port was constructed at Ford Dauphin, southeastern region of Madagascar. The works includes breakwater, revetments and groynes with stone materials, dredging 783,000m<sup>3</sup>, design and built of quay structure (275m long, water depth -17.4m). This port was constructed in a short time period of 1,000 days.
