Providing Services

3CF is a start-up company that provides logistics management service through our cloud platform. We have alliances with reliable major forwarders in Japan, global carriers and a software company in US. Users can arrange the shipment by easy & quick comparison with its estimations, schedules and shipping modes respectively. Also users can have communication with colleagues, forwarders and their clients sharing the status.

Standardized & Sharing Work Platform

Project Achievement / Technical Expertise

We have expertise in global trade business, logistics management and IT service and 3CF&Co provides the best solutions to our clients through our UI, which is continuously improving.

【SHIPMENTS LIST】

The screenshot shows a software interface with a world map at the top and a table below. The table contains columns for shipment details such as origin, destination, and status.

【TASK MANAGEMENT】

The screenshot displays a task management interface with a list of tasks, each with a status indicator (e.g., 'START', 'STOP'). A map on the right side shows the geographical context of the tasks.

【ESTIMATIONS】

The screenshot shows a grid of multiple data tables, likely used for comparing and managing cost estimations for different shipping routes and services.
