Providing Services

SANSHIN Corporation has been acting as geotechnical specialists since the establishment on 1956. Our motto representing SANSHIN is “to be faithful, to have belief and to be reliable”.

We keep a strong spirit, “to create better, original and valuable technologies” since the establishment. We want to contribute for safe and comfortable life through infrastructural development harmonizing with global environment.

Iconic three lines of company’s logo symbolize our task on Infrastructure and BOSAI .

- To protect from natural disaster,*
- To sustain the land, and*
- To handover to next generation.*

Future will be realized by SANSHIN technologies. Satisfaction by SANSHIN will be delivered to future.

Project Achievement / Technical Expertise

We provide you our geotechnical technologies not only for carrying out on site but for designing and planning.

For seismic impact on foundation, our ground stabilizing technologies will give reliable solutions. **V-JET** columns under existing facilities and structures mitigate your foundation. **WILL** stabilizing technology lets you satisfy construction of river dyke on soft ground.

Risk in liquefaction of existing facility is also mitigated by **CPG** grouting technology. **CPG** technology, in addition, has tremendous experiences for lift-up of inclined facilities.

For unstable slope, **Soil Nailing** will protect to land slide and will ensure residences and properties on the slope.
