Clients	Constructors Concrete precast factories Rental companies Trading firms		

## Providing Services

EXEN contributes to infrastructure development around the world by providing construction machinery such as concrete vibrators and concrete cutters, and general industrial machinery such as handheld roll sweepers. The services we provide are research, development, design, manufacturing, sales, and consulting for related equipment. Especially in the concrete precast industry, we have more than decades of extensive experience and achievements. The excellent distributors around the world we have can always provide you with the best service.

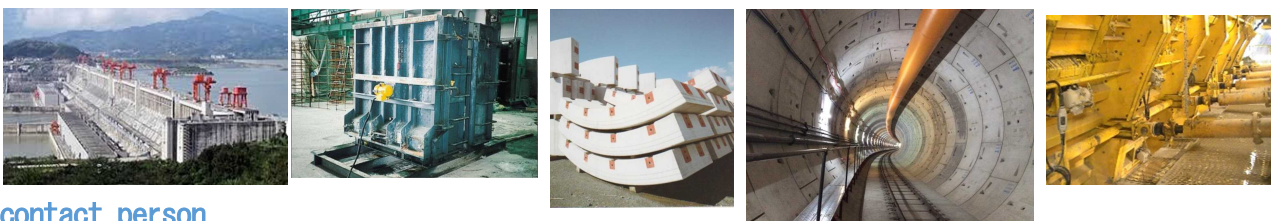

## Project Achievement / Technical Expertise

EXEN products are active in many construction sites.

They are inevitably used to build major facilities such as dams, airports, roads, tunnels, bridges and skyscrapers.

Hydroelectric dam construction: More than 250 sets of vibrators have been delivered in many dam construction sites in Japan, China, Asian countries and African countries.

For large tunnel construction: Subway sites in China, Singapore, Malaysia, Thailand, Indonesia, Philippines, Vietnam, and the Bay Highway across Tokyo, etc.
