Comprehensive Solutions Provider in Power, Energy and Infrastructure

Toyota Tsusho Corporation (TTC) is a logistics, trading and investment arm in Toyota Group companies. TTC operates globally with 7 business divisions; 1) Metals, 2) Global Parts & Logistics, 3) Automotive, 4) Machinery, Energy & Project, 5) Chemicals & Electronics, 6) Food & Consumer Services, and 7) Africa.

TTC has been actively developing projects in power, energy and infrastructure sectors all over the world; especially the Middle East, Africa and Asian regions where there have been many challenges in the people's life and industrial developments, and TTC has been there to find and provides the best solutions together with all the related stakeholders including each government, each people. Such solutions are supported by Japanese Government's initiative of High Quality Infrastructure for the efficiency, the pro-environment and disaster prevention.

In 2017 TTC has established newly Africa division to drive our business development in Africa. Under the slogan of **"With Africa, For Africa"**, we will continue our journeys as solutions provider in there as well.

Our footprints has been extended to varieties of infrastructures such as ;

<Power >

- 1) Renewable power generation such as wind, geothermal, PV solar
- 2) Conventional thermal power generation.
- 3) Power transmission facility such as Transmission & Distribution Line and Substation.

<Logistics and Ports>

- 4) Marine Ports infrastructures such as cranes, berths and its security system
- 5) Airport facilities
- 6) Vessels, boats and dredgers.
- 7) Road Infrastructures such as bridges, flyovers and traffic control systems.

<OIL & Gas >

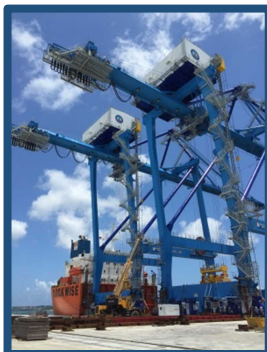

- 8) Oil & Gas infrastructures such as offshore rigs and pipelines.

<Others >

- 9) Tele communication equipment and network facilities

Wherever the challenges are, TTC will be there to find & provide solutions
