Providing Services

Mitsubishi Electric provides various products with high quality and reliability to support safe and comfortable train operation in the world.

As a leading provider of full spectrum of railway solutions, Mitsubishi Electric will continue to create the future of the industry with its extensive experience and technology.

Project Achievement/Technical Expertise

Mitsubishi Electric is committed to contribute to society and daily life around the world, as a leader in the manufacture and sales of electric and electronic products and systems used in a broad range of applications.

Since its foundation in 1921, Mitsubishi Electric has been an equipment supplier for railway systems to realize powering, braking, controlling and comfort functions by a single company, as well as a system integrator providing total support for transportation systems with extensive knowledge gained through past projects.

Mitsubishi Electric has supplied its railway equipment for 56,000 cars in 35 countries (as for March 31, 2019) and will continue to deliver tomorrow's world of mobility with cutting-edge transportation solutions.
