Providing Services

“Yokogawa Bridge Works Ltd.”, was the former name of **Yokogawa Bridge Corp.** and was founded as a pioneer in the market of **steel bridge construction** by Dr. Tamisuke Yokogawa in 1907. It has been a leading company in the steel bridge market, and has been involved in the construction of major infrastructure works in Japan and other countries for over 100 years. These include prestige projects such as Akashi Bridge, Kap Shui Mun Bridge, Yokohama Bay Bridge and Stonecutters Bridge. Our business started from steel bridge construction, and has extended into the markets of **architecture, bridge retrofit, environment and civil works** encompassing all areas of infrastructure.

Akashi Bridge (Suspension Bridge)

Project Achievement / Technical Expertise

The features of steel bridges are **“Various design”**, **“Safe & rapid site works”**, **“Excellent Materials & Fabrication Technologies”**, and **“Good durability & Less Maintenance”**.

As the leading company in steel bridge business in Japan, we have been involved in **Design, Fabrication, Erection and Retrofit of steel bridge projects** based on expertise and resources gained in our 100 year history.

We have been involved in a number of projects all over the world and we can provide **Total solutions for any kind of steel bridge projects.**

Railway Bridge (Truss, Vietnam)
